OUR PURPOSE

The purpose of RGi CME is to help health systems assist their physicians to achieve their continuing medical education credits. As State and Federal standards become increasingly stringent, RGi CME has become a vital resource to a number of significant hospitals and physicians in our region. We also have developed significant relationships with prestigous learning institutions and teaching hospitals in the Philadelphia region.

IS RGI CME RIGHT FOR YOU?

- Does your institution employ physicians who require continuing medical education?

- Does your CME program offer a way for physicians to acquire CME credits outside of regular working hours?

- Does your current program allow your CME coordinator to track physicians' credits online?

- Does your current program allow physicians to offer feedback?

- Does your current program give your physicians access to the highest quality and most cutting edge lectures in the industry from prominent teaching hospitals and universities?

*Note: You will also have the option to purchase CME Lectures from the RGi CME Library as they become available.

How It Works

Step1 The RGI Multimedia Team comes and video tapes your lecture or seminar.

Step2 Multimedia technicians remove the audio from the tape to be transcribed by our transcription team. Simultaneously, our graphic designers convert the slides from the presenter's PowerPoint presentation into graphics that fit the CME on-line web

Step3 We break the completed transcription and audio files into segments which are coordinated with the presentation slides.

Step4 Exam questions or survey materials are created and approved by your staff.

Step5 The approved content is available via the web to be viewed on a secure website by your health care system's physicians or students.
